

VISION

Plessen Healthcare was incorporated in 2014 with the vision to improve the local healthcare infrastructure for residents of St. Croix while attracting medical tourism to the island to boost the local economy. With the conscious choice to lease and build out its ambulatory surgical center ("ASC"), medical clinics and offices in the entire lower level of the new GERS building, Plessen supports the government and its retirement system. With this significant capital investment on the island of St Croix, Plessen's facility has greatly improved options and access to efficient, accountable and affordable healthcare to an underserved population. Plessen will attract new residents and retain existing residents who require quality healthcare, and will also attract specialized medical professionals to St. Croix. By increasing confidence in the availability and quality of local healthcare, it will be much easier to market the USVI as a prime destination for talent and capital.

3004 Orange Grove, Suite 2
